EDUCATION

Air University, PAF Complex Islamabad, Pakistan

BS Computer Science

Sep 2023 – Jul 2027

EXPERIENCE

Air University, Islamabad

Jul 2026 – Present

AI Engineer Intern (in house)

Building Falsora, a forensic engine for deepfake and image tampering detection, using CNN architecture with Grad-CAM explainability.

MBZUAI

Jul 2026 – Present

AI Engineer

Building an OCR pipeline that grades handwritten Arabic assignments accurately despite student mistakes.

Institute for Transformative Leadership

Jun 2026 – Jul 2026

Research and Development (R&D) Intern

Built ReWaste, the first digital waste exchange platform for Pakistani SMEs.

PROJECTS

MindSync – Cognitive Load Recommender

Python, Streamlit

AI-powered mental wellness app using fuzzy logic inference and Q-learning to deliver personalized recommendations.

LeafScan AI – Plant Disease Detection System

Python, Streamlit, OpenCV

ML web app for plant disease detection using computer vision, feature extraction, and Random Forest classification.

CinaVersa – Movie Streaming Platform

React, NestJS, PostgreSQL

Full-stack streaming platform featuring AI recommendations, RBAC, parental controls, and subscription management.

PandaProctor – Online Examination System

Python, C++

Secure examination platform utilizing Haarcascade face detection for real-time verification and cheat prevention.

UniConnect – Blazor Web Application

C#, JS, SQL, Blazor

Full-stack campus portal featuring event management, lost-and-found services, authentication, and AI student chatbot.

Google OAuth Authentication Tool

HTML, Flask

Passwordless authentication system using OAuth 2.0 via Google, eliminating credential exposure.

SKILLS

Languages: Python, C++, C#, JavaScript, SQL, HTML/CSS, Assembly Language
AI & ML: Machine Learning, Reinforcement Learning, Q-Learning, Fuzzy Logic, Computer Vision, Feature Engineering
Frameworks: React, NestJS, Blazor, Flask, Streamlit, Entity Framework Core, OpenCV, Scikit-Learn, Pandas, NumPy
Tools & Cloud: PostgreSQL, SQL Server, Railway, Vercel | Git, GitHub, Visual Studio, VS Code

PUBLICATIONS

All Languages Matter: Evaluating LMMs on Culturally Diverse 100 Languages – Co-author, MBZUAI (CVPR 2025)
Culturally-diverse Multilingual Multimodal Video Benchmark & Model – Co-author, MBZUAI (2025)

AWARDS & CERTIFICATIONS

Young Author Award (YAA)

Apr 2022

First Prize, Pakistan Learning Festival

Robotics Programme – Punjab Colleges

Sep 2022

Quizzes, assessments, and project displays focused on AI and Robotics.

Git It Together – GitHub Skills Certificate

Oct 2024

AUCIS — Hands-on training on GitHub version control, branching, and collaboration.

How Transformer LLMs Work – DeepLearning.AI

Aug 2025

Learned transformer architectures, embeddings, attention mechanisms, and tokenization.

VOLUNTEERING

Microsoft Learn Student Ambassadors, Air University

Sep 2024 – Jun 2025

Operations Team Member — Organized technical workshops for 100+ students.

Air University Computing and Innovation Society (AUCIS)

Sep 2024 – Dec 2025

Management Team Member — Coordinated cross-functional teams for events.

Google Developer Student Clubs, Air University

Sep 2024 – Jun 2025

Marketing Team Member — Executed marketing campaigns for technical events.
