

Maheen Fatima

Islamabad, Pakistan

maheenfatima4466@gmail.com — 0334 7943134 — [LinkedIn](#) — [GitHub](#)

EDUCATION

Air University, PAF Complex Islamabad, Pakistan

Sep 2023 – Jul 2027

BS Computer Science

EXPERIENCE

TA39

Jul 2026 – Present

AI/ML Engineer

Benchmarking state-of-the-art multimodal VLMs for Arabic handwritten OCR using an automated evaluation framework and quantitative performance metrics.

Air University, Islamabad

Jul 2026 – Present

AI Intern (In House)

Building Falsora, a forensic engine for deepfake and image tampering detection, using CNN architecture with Grad-CAM explainability.

Institute for Transformative Leadership

Jun 2026 – Jul 2026

Research and Development (R&D) Intern

Built ReWaste, the first digital waste exchange platform for Pakistani SMEs. [GitHub](#)

PROJECTS

MindSync – Cognitive Load Recommender

Python, Streamlit

AI-powered mental wellness app using fuzzy logic inference and Q-learning to deliver personalized recommendations based on mood, sleep, and stress; trained on real-world health datasets. [GitHub](#)

LeafScan AI – Plant Disease Detection System

Python, Streamlit, OpenCV, Scikit-Learn

Machine learning-powered web application for plant disease detection using computer vision, feature extraction, and Random Forest classification to identify healthy and diseased leaves from uploaded images. [GitHub](#)

CinaVersa – Movie Streaming Platform

React, NestJS, PostgreSQL

Full-stack streaming platform featuring AI-driven recommendations, role-based access control, parental controls, and subscription management; deployed at [cinaverse-webapp.vercel.app](#). [GitHub](#)

PandaProctor – Online Examination System

Python, C++

Secure examination platform utilizing Haarcascade face detection for real-time identity verification, monitoring, and cheat prevention. [GitHub](#)

UniConnect – Blazor Web Application

C#, JavaScript, SQL, Blazor

Full-stack campus portal featuring event management, lost-and-found services, secure authentication, and an AI-powered student support chatbot. [GitHub](#)

Google OAuth Authentication Tool

HTML, Flask

Passwordless authentication system using OAuth 2.0 via Google, eliminating credential exposure and improving login security. [GitHub](#)

SKILLS

Programming Languages: Python, C++, C#, JavaScript, SQL, HTML/CSS, Assembly Language

AI & Machine Learning: Machine Learning, Reinforcement Learning, Q-Learning, Fuzzy Logic, Computer Vision, Feature Engineering, Data Analysis

Frameworks & Libraries: React, NestJS, Blazor, Flask, Streamlit, Entity Framework Core, OpenCV, Scikit-Learn, Pandas, NumPy

Databases & Cloud: PostgreSQL, SQL Server, Railway, Vercel

Tools: Git, GitHub, Visual Studio, VS Code

Communication: Technical Writing, Research Writing, Oral Communication, Presentation Skills

PUBLICATIONS

All Languages Matter: Evaluating LMMs on Culturally Diverse 100 Languages – Co-author, MBZUAI (CVPR 2025). [Paper](#) [GitHub](#)

Culturally-diverse Multilingual Multimodal Video Benchmark & Model – Co-author, MBZUAI (2025). [Paper](#)

AWARDS & CERTIFICATIONS

Young Author Award (YAA) – First Prize, Pakistan Learning Festival (Apr 2022)

Robotics Programme – Punjab Colleges (Sep 2022)

Participated in quizzes, assessments, and project displays focused on AI and Robotics.

Git It Together – GitHub Skills Certificate – Air University Computing and Innovation Society (Oct 2024)

Hands-on training on GitHub version control, repository management, branching, pull requests, and collaboration workflows.

How Transformer LLMs Work – DeepLearning.AI (Aug 2025)

Learned transformer architectures, embeddings, attention mechanisms, tokenization, and Mixture of Experts (MoEs).

VOLUNTEERING

Operations Team Member – Microsoft Learn Student Ambassadors, Air University

Sep 2024 – Jun 2025

Organized and executed technical workshops and events for 100+ students, enhancing community engagement and learning opportunities.

Management Team Member – Air University Computing and Innovation Society (AUCIS)

Sep 2024 – Dec 2025

Drove strategic initiatives and coordinated cross-functional teams to improve society operations and event delivery.

Marketing Team Member – Google Developer Student Clubs, Air University

Sep 2024 – Jun 2025

Designed and executed marketing campaigns for technical events and workshops, expanding outreach across the university.
